**Emergency Call Paging:
Pre-recorded paging broadcast**

Issue
001

Have you ever been at the local supermarket or hardware store and heard the P.A. system come across the air ...

"Co..ld we p..ase have a ser... advi.... to ais..le <CLICK>"

and you're left wondering what they were asking for, and where was that person meant to go? Glad it wasn't you right?

Little things like this can lead to a lot of customer frustration, but with **Ericsson-LG iPECS**, the solution is simply a button press away!

EMERGENCY CALL PAGING IS SIMPLE and EFFECTIVE

1. Simply record or upload your different department greetings into the iPECS system.

2. Determine which phones / devices are in the required page zones.

3. Program feature code onto the required buttons.

4. Press button to push pre-recorded announcement over the page zone!

No more garbled messages, no more confusion, more happy customers!

Security Pendant

Wall Panic Button

OTHER USES FOR EMERGENCY CALL PAGING

By connecting your iPECS PABX to your security system, you can utilize the emergency call page feature and integrate with devices such as **PANIC BUTTONS** or **SECURITY PENDANTS**.

Such devices provide the user a radio link back to the security system, that will automatically trigger an uninterrupted, pre-recorded message to all phones in the page zone.

This allows for **clear**, **concise** information to be passed along to the appropriate personel, to ensure a rapid and appropriate response to the people in need.

This situation is perfect for Schools, Medical Centres, Aged Care and many others.

Contact **Nine-One-One Communication Supply Inc.** for more information or to find an authorized dealer in your area.
